

463

CHILDERIC I (432?-481) became king of the Salian Franks about 458. As an ally of Rome he fought the Visigoths in 463, and later waged war on Saxons. His capital was at TOURNAI, where his tomb was discovered in 1653.

463

FRIDERIC^(the Gothic) was given the task of occupying
& organizing the conquered territories but
in 463 he had to protect the northern
border of the Gothic realm
Then Aegidius struck.

463

AEGIDIUS Attached with his Franks
via Orleans and defeated the Goths.
~~King~~ FRIDERIC was killed in Action.

Victories (~~in Victories~~) of Augustus who had been appointed by Pope Hilarius to undertake Cal. revision devised the Great Paschal (i.e. Passover) period (sometimes later referred to as the VICTORIAN period). It was a combination of the solar cycle of 28 yrs and the Metonic 19-year cycle bringing the FULL moon back to the same day of the month and

amounted to $28 \times 19 = 532$ years.

On the 6th century, this period was used by Dionysius EXIGUUS (Dennis the Little) in computing the date of Easter, because it gave the day of the week for any day in any year, and so it also became known as the Dominical period.

Beginning with the year now called 532 AD as the 1st year of a new great period (Be period) and the year now designated 182 as the beginning of the 2nd period cycle as the beginning of the 3rd period cycle.

AD. 463

Emc. Britt.

VICTORIUS (^{or} Victorinus) of Aquitaine
(who had been appointed by Pope
HILARIUS to revise Cal), devised
the Great Pascal (i.e. Paschal) period.
It was a combination of the solar
cycle of 28 yrs and the Metonic
cycle of 19 yrs, bringing the
FULL MOON back to the same day
of the month and accounted

8 28 x 19 ~ 532 years
